## WEATHER SYNOPSIS BY REGION:

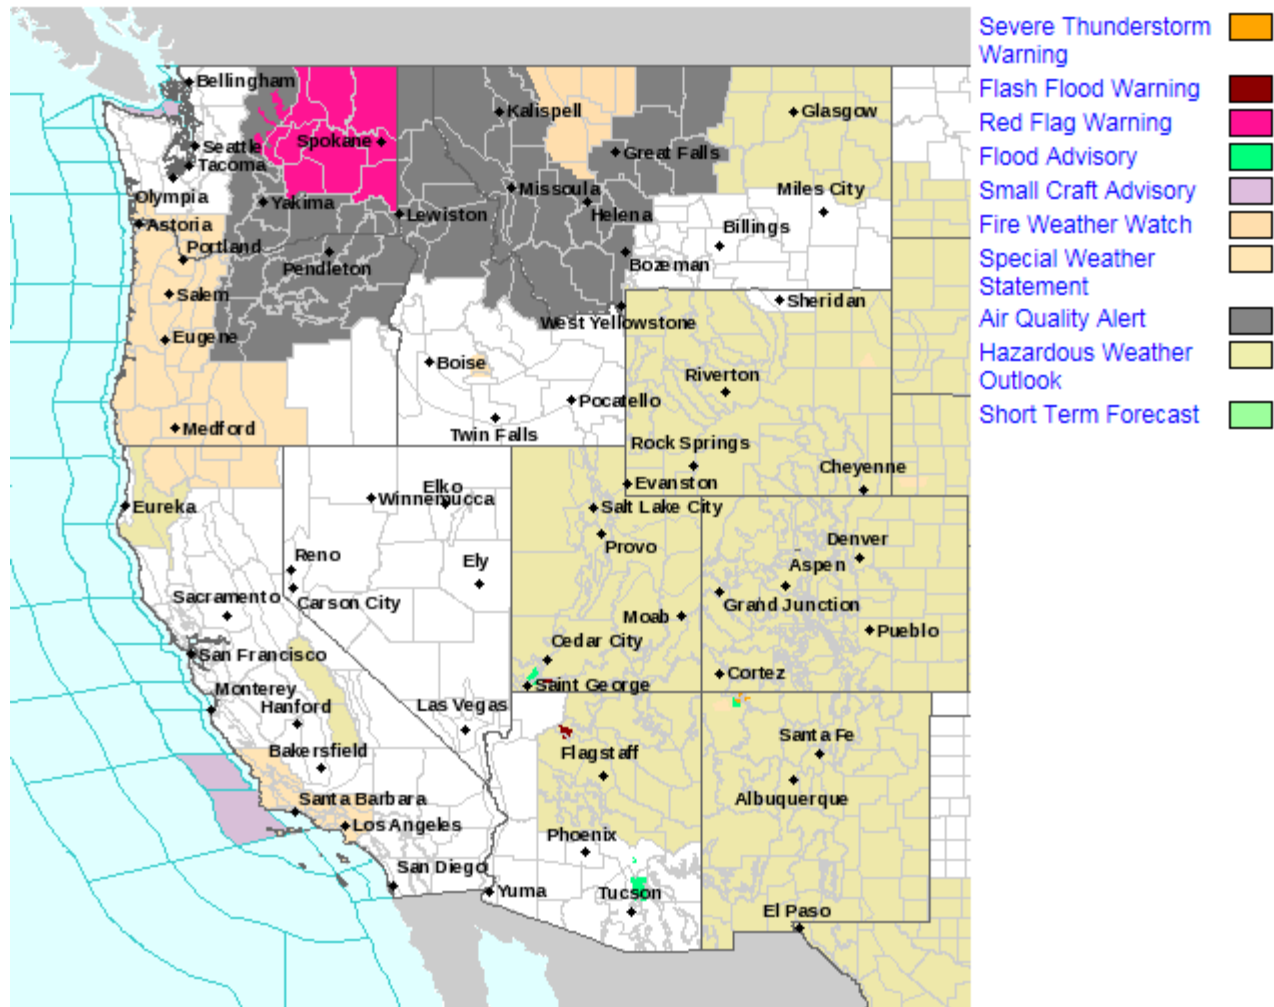

### **NORTHERN CALIFORNIA**

Moderately strong southwest winds aloft will continue over northern California for the next few days. These winds surface onto the exposed terrain of northeastern California. Peak gusts reached a 30-35 mph range Tuesday, and might hit the upper 30s today. The wind is due to tighter pressure gradients that separate the low pressure in the northeast Pacific from a large strong dominating the Four Corners states. Look for another two generally warm and dry days across the Northern California interior today and Thursday. We will then start to see initial signs Thursday night of a significant change in the governing pattern for Friday evening into the weekend. A higher latitude low will phase in with the low offshore of Oregon Friday, helping to swing a trough from the low eastward and across northwestern California Saturday. We expect a rain-bearing cold front to move across far northern California, though wetting precipitation could be confined to Del Norte and northwest Humboldt counties or quite nearby. But even for the larger share of Northern California that will get zero to non-wetting rains, there will still be a couple of days having significant cooling, somewhat higher relative humidity, improved overnight relative humidity recovery, and occasionally partly cloudy skies. Weather models are quite inconsistent starting next Monday or Tuesday, as to whether there will be a second shower producing weather disturbance by mid to late next week. Either way next week for Northern California overall, we expect to remain influenced much of the time by at least weak low pressure troughing. General winds will maintain southwest to northwest components, with decent moderately-deep marine effects in the west combined with low level onshore flow.

### **SOUTHERN CALIFORNIA**

Extensive cloud cover yesterday inhibited thunderstorm development, but more sunshine today may result in an uptick in convection over Southern California. Most of the storms will be near the higher terrain including the Angeles, San Bernardino and Cleveland National Forest as well as the deserts south of I-15. The storms may produce brief heavy rainfall due to slow storm movement. Further north, the air mass remains quite dry and minimum relative humidity in the Sierras may drop to 10-15% this afternoon. Developing southwesterly flow will shift the storms toward the Arizona and Nevada borders Thursday. No storms are expected Friday through at least the middle of next week. Temperatures will be very warm through Saturday with highs averaging about 10 degrees above normal. The coastal areas as well as the mountains above 7,000 feet will see temperatures well into the 80s with readings of 100-105 in the valleys and up to 110 in the deserts. Sunday and much of next week, a series of troughs will cause onshore flow to increase, leading to cooler temperatures. Highs should be back to near seasonal averages by next Monday and Tuesday. It may turn breezy in and near the deserts during the afternoon hours next week.

# SITUATION SUMMARY

## FIRES, SOUTHERN OPERATIONS AREA

### Rough, Vegetation Fire, Fresno County

Location: 5 miles north of Hume Lake and 2.5 miles southwest of Spanish Mountain

Jurisdiction: FRA

Start Time: 07/31/15 at 1933 hours

Per Cal OES, CAL FIRE, and/or ICS-209 as of 08/26/15 at 0600 hours:

- 55,989 Acres, 25% Contained

Evacuations/Shelters:

- Mandatory Evacuation Areas:
  - The Hume Lake Christian Conference was evacuated 08/18/15. Per the Cal OES Law Duty Officer (LDO) evacuation was accomplished in less than 2 ½ hours due in significant part to prior planning between Fresno Sheriff and the Camp Staff. The group of 750 to 1000 people were evacuated to a sister Church in Fresno for sheltering.
  - There are 250 mandatory evacuations in the National Park Campgrounds in the immediate area of Hume Lake Christian Camp.
  - There has been an evacuation of 32 private residences, believed to be all vacation homes in the Big Meadow and Heart Meadow Neighborhood.
  - Approximately 1,500 campers in several Kings Canyon National Park Campgrounds located along 10 Mile Rd have been placed under mandatory evacuation.
- EOC Activations: Fresno County EOC is activated at Level 2 from 0730-1800.
- The California Highway Patrol has also moved the road closure, which had been located at the intersection of Highway 180 and Hume Lake Road. The new road closure now sits further south on Highway 180 at Grant Grove Tree (approximately 2 miles north of the Hwy. 180 and Hwy. 198 interchange). The roadway will remain closed until authorities determine it is safe to reopen. The Sheriff's Office wants to make the public aware that no one will be allowed to enter the Hume Lake area; people will only be allowed to exit.
- Per CUEA, PG&E critical facilities and distribution assets are no longer in a high risk category for threats to power serving Central California. CAISO has reviewed PG&E facility locations that may be impacted by the fire and none of the locations would compromise the grid in any capacity. There would be no brownouts if these sites were impacted.
